LAI CHEE HOONG

Web Developer, Stock Keeper and Sales

I began web development in 2019 and enjoy building modern apps with Next.js, React, Redux, MongoDB, and Tailwind CSS. I'm skilled in creating RESTful APIs using Node.js, Express, and Mongoose. I learn from Udemy, Stack Overflow, YouTube, and official docs, and use ChatGPT, Grok, and DeepSeek to enhance my skills through continuous learning and practice.
